

# STEM CELL THERAPY

ALTERNATIVE NATURAL TREATMENT OPTIONS

Enhance healing and  
recovery from orthopaedic  
injuries and disease

# CNOS

IMPROVING HEALTH

## ORTHOBIOLOGICS

Orthobiologic therapy uses your body's own stem cells to treat orthopaedic injuries and joint disease. Regeneration occurs at the cellular level and may help preserve joint health, treat chronic pain and swelling, and heal orthopaedic injuries.

### WHAT CAN BE TREATED?

Arthritis	Sprains & Ligament Tears
Joint Pain	Tendinitis
Muscle Injury	Soft Tissue Injuries
Plantar Fasciitis	Swelling
Meniscus Tears	Cartilage Injury

## BONE MARROW CONCENTRATE THERAPY

Bone Marrow Concentrate (BMC) is utilized where there is joint damage, pain and functional loss.

- BMC is placed at the treatment site using ultrasound guidance
- BMC Therapy jump starts the healing process at the cellular level
- Studies show that BMC Therapy may slow, or in some cases reverse cartilage and joint damage

### WILL MY INSURANCE COVER THIS?

Currently, most insurance companies still consider this to be experimental treatment. If your insurance does not cover the treatment we will discuss other options with you.
